RAJESH B

Software Engineer — ASP.NET | C# | MVC

+91 70946 82761 | rajeshg160399@gmail.com | Puducherry, India

Portfolio: rajeshg160399-git.github.io | **GitHub:** github.com/rajeshg160399-git

PROFILE SUMMARY

Software Engineer with 3+ years of experience designing, developing, and maintaining ASP.NET MVC/Core web applications end-to-end — from front-end UI to SQL Server business logic. Delivered four production applications for international clients across Australia and the United States, spanning payments, marketing platforms, booking systems, and student portals. Skilled in Entity Framework, LINQ, Angular, and REST API integration, with hands-on experience across the full development lifecycle including testing and CI/CD deployment.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript

Web: ASP.NET MVC, ASP.NET Core, Angular 13, HTML, CSS, Bootstrap, jQuery, AJAX, DataTables, SignalR, Kendo UI

Data: Entity Framework, LINQ, Microsoft SQL Server (2019, 2022), MySQL, Stored Procedures, User-Defined Functions

Other: Web API, DevExpress, Postman, Swagger, IIS (6.0 / 7.0 / 10), Visual Studio, Agile

DevOps: Bitbucket (version control), Jenkins (CI/CD deployment)

AI Tools: Codex (requirement analysis, feature/page implementation), Claude (bug fixes, code review and correction), MCP (evaluated on sample project)

PROFESSIONAL EXPERIENCE

Software Engineer **Aug 2023 – Oct 2026**

Tender Software India Pvt. Ltd. | Puducherry, India

Market Pro Website · *Client: Australia* · *Team of 3* *Aug 2023 – Jan 2026*

- Built responsive front-end components using DevExpress, jQuery, and JavaScript for a digital marketing agency platform serving multiple client accounts.
- Designed and implemented business logic through SQL Server functions and stored procedures, along with Entity Framework and LINQ, reducing redundant data-access code across modules.
- Tested and validated APIs and backend functions using Postman, cutting down integration defects reported during QA cycles.

REVLR — Club Table Booking Platform · *Team of 3* *Jun 2024 – Nov 2024*

- Built and configured front-end features using Angular 13 services, enabling real-time table availability and booking updates.
- Completed end-to-end API integration on the Angular front end, connecting booking, payment, and notification services.

Market Pay · *Client: Market Pay, Australia* · *Team of 3* *Aug 2024 – Jan 2026*

- Developed, customized, and deployed a payments web application supporting multiple payment methods for retail merchants.
- Developed and maintained transaction and claims modules, including database design and implementation of supporting database structures and user-defined functions.
- Configured application settings, database backups, and transaction reporting using SQL Server functions and stored procedures, improving reporting turnaround for finance teams.
- Built front-end components using Kendo UI and TypeScript for transaction dashboards and reporting screens.

LaunchLife International Website · *Client: United States* · *Team of 2* *Feb 2026 – Oct 2026*

- Built a full-scale student portal front end (deployed for institutions in Canada and the US) using Bootstrap, jQuery, and JavaScript.
- Developed business logic via SQL Server functions and stored procedures to support enrollment and academic record workflows.
- Tested and validated Canvas LMS API integrations using Postman, ensuring reliable data sync between the portal and Canvas.
